

GuestGuard Inspector Certification

Complete Question Bank and Answer Key

100 multiple-choice questions across 10 curriculum categories. Every question includes all four possible answers and clearly identifies the correct response.

CONFIDENTIAL - INTERNAL REVIEW ONLY

This document contains the complete answer key. Do not distribute it to learners.

Initial exam selection: 5 questions per category, 50 total. Passing score: 80%.

Curriculum Coverage

The production exam selects five questions from every category, guaranteeing balanced coverage. Retakes target categories associated with missed questions.

Category	Pool	Initial exam
GuestGuard purpose and inspector role	10	5
Workflow, remediation, and documentation	10	5
Exterior, access, pools, and pets	10	5
Fire safety and emergency evacuation	10	5
Electrical, utilities, detectors, and hazards	10	5
Accessibility measurements and judgment	10	5
Kitchen and appliances	10	5
Bathroom and hallway	10	5
Bedroom and common room	10	5
Overall property and guest experience	10	5
TOTAL	100	50

GuestGuard purpose and inspector role

10 questions in pool - 5 selected for the initial 50-question exam

Question 1 - q001

What is GuestGuard's primary role in the short-term rental industry?

A	A third-party auditing system for property quality and consistency	CORRECT
B	A booking marketplace that sets nightly prices for rental properties	
C	A property manager that handles reservations and guest communication	
D	A licensing board that regulates residential building construction	

Question 2 - q002

How does a GuestGuard inspection differ from a traditional home inspection?

A	It evaluates only cosmetic features that appear in listing photographs	
B	It focuses on the guest experience rather than a buyer's structural concerns	CORRECT
C	It replaces professional observation with a host-completed questionnaire	
D	It concentrates on estimating repairs before a residential property sale	

Question 3 - q003

Which set best describes the main GuestGuard inspection focus?

A	Pricing, occupancy, advertising, revenue, and local tax compliance	
B	Structure, foundation, roofing, resale value, and title documentation	
C	Safety, comfort, accessibility, cleanliness, and guest amenities	CORRECT
D	Reservations, cancellations, refunds, reviews, and host availability	

Question 4 - q004

Why does GuestGuard use a standardized inspection framework?

A	To guarantee that every certified property has identical furniture	
B	To eliminate the need for inspectors to use professional judgment	
C	To determine which booking platform must advertise each property	
D	To give guests verified information and hosts consistent standards	CORRECT

Question 5 - q005

What is a major benefit of certification for a property host?

A	It guarantees a specific occupancy rate during every travel season	
B	It provides a marketing asset and actionable property feedback	CORRECT
C	It transfers responsibility for property maintenance to GuestGuard	
D	It automatically satisfies every local rental licensing requirement	

Question 6 - q006

What should guide an inspector's judgment throughout the rubric?

A	Whether a guest would feel comfortable and well cared for	CORRECT
B	Whether the property resembles other rentals in the neighborhood	
C	Whether the host has chosen the least expensive available equipment	
D	Whether each room contains the same number of listed amenities	

Question 7 - q007

Why are many of the 169 rubric questions conditional?

A	They are reserved for inspectors who hold additional state licenses	
B	They are selected according to the host's preferred inspection length	
C	They appear only after the inspector completes the overall property score	
D	They appear only when a property feature makes them relevant	CORRECT

Question 8 - q008

What is the inspector's responsibility when a hazard is found?

A	Repair the hazard if the work can be completed during the visit	
B	Decide whether the property must be removed from all rental platforms	
C	Document the condition clearly so the host can address it	CORRECT
D	Negotiate a repair schedule directly with the next arriving guest	

Question 9 - q009

What professional activities carry over from traditional inspection work?

A	Observing, testing, measuring, and documenting property conditions	CORRECT
B	Advertising, booking, collecting deposits, and resolving guest disputes	
C	Appraising, financing, underwriting, and transferring property ownership	
D	Designing, permitting, constructing, and furnishing rental properties	

Question 10 - q010

Why are amenities recorded even when they are not strict pass-fail items?

A	They determine which inspector receives the next available assignment	
B	They replace safety findings when a property has premium features	
C	They establish the property's assessed value for insurance purposes	
D	They help guests understand the experience the property provides	CORRECT

Workflow, remediation, and documentation

10 questions in pool - 5 selected for the initial 50-question exam

Question 11 - q011

How should an inspector move through the property?

A	Complete all safety questions first, then return for the remaining items	
B	Finish each room before moving to the next room	CORRECT
C	Photograph every room first, then complete the rubric off-site	
D	Begin with amenities and leave utility checks until the final pass	

Question 12 - q012

Which device is recommended for completing an inspection?

A	A tablet because its room-by-room view is compact and easy to use	CORRECT
B	A desktop computer because the rubric requires a wired connection	
C	A digital camera because mobile devices cannot upload inspection evidence	
D	A paper checklist because electronic responses are entered after the visit	

Question 13 - q013

What happens after an inspector marks “no” on a remediable item?

A	The entire inspection closes and must be restarted by corporate staff	
B	The host receives an automatic certification with a warning attached	
C	A description is requested and a remediation task is created	CORRECT
D	The inspector must purchase the missing item before leaving the property	

Question 14 - q014

Who signs off after a host submits evidence that a remediation was completed?

A	The next guest who books the certified rental property	
B	The local building department responsible for occupancy permits	
C	The inspector's employer without reviewing the submitted evidence	
D	The GuestGuard corporate team after reviewing the correction	CORRECT

Question 15 - q015

What is the expected duration of a typical GuestGuard inspection?

A	Approximately fifteen to thirty minutes for a standard property	
B	Approximately one to two hours for a standard property	CORRECT
C	Approximately three to four hours regardless of property features	
D	Approximately one full workday for every certified rental property	

Question 16 - q016

Why would a five-to-ten-minute inspection raise concern?

A	It suggests the inspection was not completed with adequate care	CORRECT
B	It means the host selected too few available appointment windows	
C	It prevents the digital platform from saving photographs correctly	
D	It indicates the inspector used a tablet instead of a computer	

Question 17 - q017

What are the three job stages described in the training?

A	Requested, scheduled, and invoiced	
B	Pending, reviewed, and certified	
C	Open, inspected, and remediated	
D	Unassigned, assigned, and accepted	CORRECT

Question 18 - q018

What should an inspector do after viewing the host's available time slots?

A	Select a slot and wait for the report to be completed by the host	
B	Create a new slot without consulting the host's requested schedule	
C	Accept one slot so the job becomes active and awaits the report	CORRECT
D	Assign the job to corporate before choosing an inspection time	

Question 19 - q019

What two purposes do inspection photographs serve?

A	They support the guest listing and document observations for the host	CORRECT
B	They replace written findings and eliminate the remediation process	
C	They verify inspector travel and determine geographic job assignments	
D	They establish property ownership and confirm the host's tax records	

Question 20 - q020

How should a photo of a flagged condition be taken?

A	From a distance so the entire room appears in a single image	
B	Clearly and carefully so the host can understand the condition	CORRECT
C	Only after the host has corrected the condition during the visit	
D	Without lighting so the image reflects the room's normal appearance	

Exterior, access, pools, and pets

10 questions in pool - 5 selected for the initial 50-question exam

Question 21 - q021

Why must exterior walkways be clear and properly marked?

A	They provide an unobstructed route during emergency egress	CORRECT
B	They create additional space for storing outdoor maintenance equipment	
C	They prevent guests from using entrances reserved for property staff	
D	They allow inspectors to skip the property's interior exit assessment	

Question 22 - q022

How close should accessible parking be to the front door?

A	Within fifteen feet of the front door	
B	Within twenty feet of the front door	
C	Within thirty feet of the front door	CORRECT
D	Within fifty feet of the front door	

Question 23 - q023

What minimum clearance is required on each side of a parked car?

A	At least eighteen inches on each side	
B	At least twenty-five inches on each side	CORRECT
C	At least thirty-six inches on each side	
D	At least forty-eight inches on each side	

Question 24 - q024

Why should overgrown shrubbery near the property be flagged?

A	It can interfere with the property's wireless internet connection	
B	It can prevent the host from documenting cleaning procedures	
C	It can make outdoor cooking equipment difficult to photograph	
D	It can provide cover for an intruder near the property	CORRECT

Question 25 - q025

What should be documented when a lockbox or coded lock is present?

A	Its purchase receipt and the date the host installed it	
B	Its location and a photograph of the access device	CORRECT
C	Its combination code and the names of all authorized users	
D	Its manufacturer warranty and replacement battery schedule	

Question 26 - q026

Which pool condition satisfies the gate-lock portion of the rubric?

A	A functional latch, even when it is not a keyed lock	CORRECT
B	A gate that closes only when pushed from the pool side	
C	A removable barrier stored near the pool equipment area	
D	A posted rule instructing guests to keep the gate closed	

Question 27 - q027

What pool-fence measurements should an inspector record?

A	Fence length, post depth, and distance from the property	
B	Gate width, hinge size, and distance from the water	
C	Fence height and the largest vertical and horizontal gaps	CORRECT
D	Panel thickness and the number of visible support posts	

Question 28 - q028

Why should a hot-tub cover be on when the hot tub is not in use?

A	To preserve the manufacturer warranty on the heating system	
B	To reduce the time required for the cleanliness assessment	
C	To prevent chemicals from being stored near the equipment	
D	To improve safety for children and pets around the hot tub	CORRECT

Question 29 - q029

When do the exterior pet-friendly questions apply?

A	When the host allows guests to bring pets to the property	CORRECT
B	When the inspector observes any animal near the property	
C	When the rental is located within walking distance of a park	
D	When the exterior includes a fenced patio or cooking area	

Question 30 - q030

Which set belongs to the exterior pet-friendly assessment?

A	Indoor crates, pet food, grooming tools, and veterinary records	
B	Walking access, fenced dog space, and waste disposal facilities	CORRECT
C	Pet insurance, vaccination records, and emergency contact numbers	
D	Floor coverings, feeding schedules, and designated sleeping areas	

Fire safety and emergency evacuation

10 questions in pool - 5 selected for the initial 50-question exam

Question 31 - q031

What does an ABC-rated fire extinguisher indicate?

A	It was manufactured for use only in commercial buildings	
B	It must be replaced within three years of the inspection	
C	It is effective against common household fire types	CORRECT
D	It is approved only for outdoor cooking and pool areas	

Question 32 - q032

Which extinguisher condition requires remediation in the practice kitchen?

A	The pressure gauge needle was outside the green area	
B	The pin and tamper seal were no longer intact	
C	The extinguisher had visible dents along its cylinder	
D	The extinguisher was not mounted at the required height	CORRECT

Question 33 - q033

About how high above the floor should a home fire extinguisher be mounted?

A	Approximately five to six inches above the floor	CORRECT
B	Approximately twelve to eighteen inches above the floor	
C	Approximately twenty-four to thirty inches above the floor	
D	Approximately forty-eight to sixty inches above the floor	

Question 34 - q034

What evidence is required when an extinguisher is stored out of sight?

A	A floor plan showing the extinguisher's exact distance from an exit	
B	A sign marking its location, with the sign photographed	CORRECT
C	A host statement confirming that guests receive verbal directions	
D	A cabinet inventory listing the extinguisher's inspection history	

Question 35 - q035

How should a battery-powered or hardwired alarm be verified?

A	Use a certificate from any alarm company issued within five years	
B	Confirm the host has listed the alarm in the guest handbook	
C	Test it and upload a video under ten seconds capturing the sound	CORRECT
D	Photograph the alarm without testing so the battery is preserved	

Question 36 - q036

What proof is acceptable for a monitored or local alarm system?

A	A current certificate from the alarm company within the last year	CORRECT
B	A photograph showing the alarm housing and manufacturer name	
C	A receipt showing when the host purchased replacement batteries	
D	A written statement from a guest who heard the alarm previously	

Question 37 - q037

What additional check applies when a fire alarm is hardwired?

A	Confirm that the alarm is mounted near an exterior doorway	
B	Confirm that the alarm includes a replaceable backup siren	
C	Confirm that the host has supplied a portable testing ladder	
D	Confirm that the hardwired alarm is currently receiving power	CORRECT

Question 38 - q038

When is an upper-floor bedroom escape ladder marked not applicable?

A	When the room has a charged flashlight near the bed	
B	For a ground-floor room or a bedroom in an apartment building	CORRECT
C	When the room has two operational doors along the exit path	
D	For a bedroom with a hardwired smoke and carbon monoxide alarm	

Question 39 - q039

What should an inspector confirm about doors on an emergency exit path?

A	They match the color and materials used in the hallway	
B	They remain locked unless the host is present at the property	
C	They unlock from inside and have usable, stable hardware	CORRECT
D	They open toward the nearest room rather than toward the exit	

Question 40 - q040

Which signage examples address open-flame safety?

A	No smoking, no candles, and no open fires	CORRECT
B	No parking, no deliveries, and no unattended vehicles	
C	No pets, no food, and no outdoor footwear	
D	No visitors, no late arrivals, and no early departures	

Electrical, utilities, detectors, and hazards

10 questions in pool - 5 selected for the initial 50-question exam

Question 41 - q041

Which wiring condition meets the GuestGuard visual standard?

A	Extension cords connected together when outlets are unavailable	
B	Power strips used only when they include surge protection	CORRECT
C	Exposed wiring permitted when it is above guest reach	
D	Multiple high-load appliances connected to one basic adapter	

Question 42 - q042

Where are GFCI outlets or breakers especially important?

A	In bedrooms and common rooms where televisions are located	
B	In hallways and closets where lighting remains switched on	
C	In kitchens, bathrooms, and other wet areas	CORRECT
D	In exterior parking spaces without overhead lighting	

Question 43 - q043

What should the basement breaker-box inspection confirm?

A	The box is labeled, accessible, covered, and visually safe	CORRECT
B	The box has been replaced within the previous calendar year	
C	The box is hidden from guests behind a permanently locked door	
D	The box includes a separate circuit for every room and appliance	

Question 44 - q044

How should the flammable-material item be answered when none is present?

A	Mark the item yes because the room is free of flammable materials	
B	Leave the item unanswered and explain the condition in final notes	
C	Mark the item no because no storage system can be evaluated	
D	Mark the item not applicable because there is nothing to inspect	CORRECT

Question 45 - q045

What is the purpose of a water-leak or freeze detector?

A	It alerts the owner to a burst or frozen pipe condition	CORRECT
B	It measures background noise near the property's utilities	
C	It verifies that wet-area outlets include surge protection	
D	It records the operating temperature of the heating system	

Question 46 - q046

Which devices belong in the "other hazard detectors" assessment?

A	Door sensors, window locks, and exterior motion lights	
B	CO, heat, and hazardous-gas detectors	CORRECT
C	Thermostats, water meters, and appliance timers	
D	Cameras, microphones, and monitored entry systems	

Question 47 - q047

Why are incandescent bulbs discouraged by GuestGuard?

A	They make it difficult to photograph appliance model numbers	
B	They interfere with hardwired carbon monoxide alarm systems	
C	They can heat up and create a fire risk in enclosed spaces	CORRECT
D	They prevent GFCI testers from identifying unprotected outlets	

Question 48 - q048

Where should an inspector look for mold in a kitchen?

A	Only on visible wall surfaces above the countertop	
B	Only inside the refrigerator and freezer compartments	
C	Only around windows located next to the cooking area	
D	Near sinks, piping, appliances, and other moisture sources	CORRECT

Question 49 - q049

How should pest evidence be evaluated during the inspection?

A	Use professional judgment in areas that guests can access	CORRECT
B	Move fixed cabinets and walls to inspect every concealed cavity	
C	Accept the host's pest-control statement without looking for signs	
D	Limit the check to exterior spaces where animals may enter	

Question 50 - q050

What should happen when mold or moisture-related growth is found?

A	Clean the affected surface before continuing the inspection	
B	Photograph and document it for GuestGuard and the host	CORRECT
C	Mark the entire room inaccessible without recording the location	
D	Contact the next guest and advise them to cancel the reservation	

Accessibility measurements and judgment

10 questions in pool - 5 selected for the initial 50-question exam

Question 51 - q051

When is the detailed accessibility assessment required?

A	For every property with more than one guest-accessible room	
B	Whenever the inspector observes a mobility device during the visit	
C	For properties identified in advance as accessibility-friendly	CORRECT
D	Only after the standard inspection has produced a passing result	

Question 52 - q052

How is bathroom doorway width measured?

A	From the inside of the frame while the door is open	CORRECT
B	From the outside edges of the trim while the door is closed	
C	From the handle to the opposite wall while the door is open	
D	From the hinge to the latch plate while the door is closed	

Question 53 - q053

What should be assessed when a bathroom approach is not straight?

A	Whether the hallway includes emergency exit signage	
B	Whether a wheelchair has enough room to turn around	CORRECT
C	Whether the sink has adequate running water pressure	
D	Whether a portable handrail is stored beside the doorway	

Question 54 - q054

What defines a roll-in shower for the rubric?

A	A shower with a fixed chair and a standard raised curb	
B	A shower with a handheld head and two permanent handrails	
C	A shower large enough for standing assistance from another person	
D	A shower entered by wheelchair with no lip or a ramped rounded lip	CORRECT

Question 55 - q055

What is recorded when a shower is not roll-in accessible?

A	The shower threshold height and the shower square footage	CORRECT
B	The distance from the shower head to the bathroom doorway	
C	The combined height of the shower chair and toilet seat	
D	The width of the bathroom hallway and the sink countertop	

Question 56 - q056

Why are four toilet-clearance measurements collected?

A	To determine whether the toilet can support a portable handrail	
B	To determine whether a wheelchair user can transfer safely	CORRECT
C	To calculate the total square footage of the bathroom	
D	To confirm the toilet is centered under the ventilation system	

Question 57 - q057

What should happen if a bedroom bed is under 24 inches high?

A	Mark the bedroom unusable without gathering more information	
B	Require the host to replace the bed before the report is submitted	
C	Ask whether bed raisers are available for the property	CORRECT
D	Measure only the mattress because floor clearance no longer applies	

Question 58 - q058

What bedroom clearances should be measured around the bed?

A	The distance from each side to the nearest unmovable obstruction	CORRECT
B	The distance from the headboard to every electrical outlet	
C	The distance from the mattress top to the nearest window	
D	The distance from the bedroom door to the television screen	

Question 59 - q059

What common-room feature should be checked for wheelchair dining access?

A	The distance between the table and the nearest exterior exit	
B	The number of chairs that can be removed without host assistance	
C	The width of the room measured between two opposite walls	
D	The table underside height and any bars blocking knee clearance	CORRECT

Question 60 - q060

What should an inspector do when a room is not usable by a wheelchair user?

A	Select not applicable and omit any explanation from the report	
B	Describe the barriers because the note will be visible to guests	CORRECT
C	Recommend a specific contractor before completing the inspection	
D	Estimate the cost of modifying the room for wheelchair access	

Kitchen and appliances

10 questions in pool - 5 selected for the initial 50-question exam

Question 61 - q061

Why are kitchen fire-safety checks more extensive?

A	The kitchen has the highest household fire risk	CORRECT
B	The kitchen usually contains the property's exit signage	
C	The kitchen is where the host stores the guest handbook	
D	The kitchen is always included in the accessibility assessment	

Question 62 - q062

How should a dishwasher be checked during the practical inspection?

A	Inspect the exterior only and record the manufacturer name	
B	Run a full cycle while continuing with the inspection	CORRECT
C	Ask the host to provide a receipt from the last service visit	
D	Fill it with dishes to confirm the advertised capacity	

Question 63 - q063

What should the sink and disposal assessment include?

A	Cabinet dimensions, pipe materials, and installation dates	
B	Drain speed, faucet brand, and the host's cleaning schedule	
C	Cleanliness, operation, water pressure, and visible leaks	CORRECT
D	Water hardness, filter age, and the disposal's electrical rating	

Question 64 - q064

How should kitchen GFCI protection be verified?

A	Assume protection is present when the outlet has a reset button	
B	Test one representative outlet and apply the result to the room	
C	Ask the host whether the breakers were installed by an electrician	
D	Use a tester on every relevant outlet in the wet area	CORRECT

Question 65 - q065

What should be recorded for a safe, clean, usable appliance?

A	A photograph and the make and model when identifiable	CORRECT
B	A replacement cost and the date the appliance was purchased	
C	A copy of the warranty and the host's maintenance schedule	
D	A video of the full operating cycle and the energy rating	

Question 66 - q066

What is the priority if an appliance make or model cannot be identified?

A	Fail the appliance because the required record is incomplete	
B	Focus on whether the appliance is safe, clean, and usable	CORRECT
C	Remove the appliance from the guest-facing property listing	
D	Require the host to submit the information before inspection ends	

Question 67 - q067

How was the microwave tested during the practice walkthrough?

A	By running a short cycle and checking operation and ventilation	CORRECT
B	By heating it to maximum temperature for several minutes	
C	By inspecting the cord without operating the microwave	
D	By asking the host to demonstrate every programmed setting	

Question 68 - q068

What should be checked while the kitchen sink is running?

A	Whether the cabinet doors remain fully open without obstruction	
B	Whether the water temperature matches the refrigerator setting	
C	Whether plumbing below the sink shows leakage or broken pipes	CORRECT
D	Whether the disposal manufacturer matches the faucet manufacturer	

Question 69 - q069

Which condition makes the microwave question not applicable?

A	The microwave is installed inside an enclosed cabinet	
B	The microwave is combined with the property's oven	
C	The microwave has no visible manufacturer label	
D	The property does not provide a microwave	CORRECT

Question 70 - q070

What final perspective should be used for the kitchen visual assessment?

A	Review only the appliances that appear in the rental listing	
B	Step back and assess floors, counters, cabinets, walls, and ceiling	CORRECT
C	Evaluate only conditions that produced a required remediation	
D	Compare the kitchen design with other rentals in the same market	

Bathroom and hallway

10 questions in pool - 5 selected for the initial 50-question exam

Question 71 - q071

Which bathroom areas deserve particular attention during a mold check?

A	Moisture-prone spaces near the sink, shower, toilet, and cabinets	CORRECT
B	Dry storage areas located above eye level and away from plumbing	
C	Only surfaces that the host identifies as recently repaired	
D	Only the doorway and hallway leading into the bathroom	

Question 72 - q072

How should toilet operation be confirmed?

A	Check the bowl visually without operating any controls	
B	Review the host's most recent plumbing service receipt	
C	Flush it and check for cleanliness, damage, and leaks	CORRECT
D	Measure water pressure at the sink and apply it to the toilet	

Question 73 - q073

What is the proper response when a bathroom has no electrical outlets?

A	Pass the GFCI requirement because the bathroom is a wet area	
B	Mark the GFCI outlet question not applicable	CORRECT
C	Fail the bathroom because every bathroom requires an outlet	
D	Test the nearest hallway outlet as a substitute	

Question 74 - q074

Why is bathroom privacy explicitly confirmed?

A	To verify that housekeeping can enter between guest stays	
B	To confirm the room contains no host-owned personal items	
C	To determine whether the bathroom needs an accessibility review	
D	To disclose whether it is shared with hosts or other guests	CORRECT

Question 75 - q075

Which bathroom amenities are informational rather than core requirements?

A	Bath soaps, shampoo, bathrobes, and a bidet	CORRECT
B	GFCI protection, working plumbing, lighting, and privacy	
C	A clean toilet, operational shower, sink, and safe wiring	
D	Mold inspection, pest inspection, odor check, and visual assessment	

Question 76 - q076

What hallway measurement is recorded for accessibility?

A	The distance from the hallway entrance to the nearest bedroom	
B	The width of the narrowest guest-accessible hallway	CORRECT
C	The height of every handle on doors along the exit route	
D	The total length of all unobstructed hallway segments	

Question 77 - q077

Which alarm types are listed in the hallway rubric?

A	Photoelectric, ionization, thermal, and combination alarms	
B	Residential, commercial, industrial, and portable alarms	
C	Monitored, local low-voltage, hardwired, and battery-powered alarms	CORRECT
D	Audible, visual, vibrating, and voice-command alarms	

Question 78 - q078

What must be photographed when other hazard detectors are present?

A	Only the detector closest to the hallway entrance	
B	Only detectors that are not connected to electrical power	
C	Only detectors that combine smoke and carbon monoxide sensing	
D	All identified detectors included in the room assessment	CORRECT

Question 79 - q079

What hallway condition represents a trip hazard?

A	An unexpected change in floor height or uneven walking surface	CORRECT
B	A handrail installed beside a stairway along the exit route	
C	A clearly marked door that opens easily from the inside	
D	A powered detector mounted near the center of the hallway	

Question 80 - q080

What should the inspector do with optional conditions not covered by bathroom questions?

A	Ignore them because optional findings cannot appear in the report	
B	Record them in the additional-notes area for the room	CORRECT
C	Convert them into accessibility failures before leaving the room	
D	Add them to the kitchen section where utilities are documented	

Bedroom and common room

10 questions in pool - 5 selected for the initial 50-question exam

Question 81 - q081

What emergency equipment should be available and tested in each bedroom?

A	A charged flashlight for guest use	CORRECT
B	A portable GFCI testing device	
C	A combination safe for valuables	
D	A battery-powered sound meter	

Question 82 - q082

What should happen after checking bedding and the mattress for bed bugs?

A	Leave the bedding removed so the host can inspect it	
B	Photograph every layer before replacing the mattress	
C	Remake the bed after completing the visual check	CORRECT
D	Replace the sheets with a sealed inspection set	

Question 83 - q083

How should air conditioning be recorded when the climate does not require it?

A	Mark the item no and create a required remediation	
B	Mark the item not applicable for that property	CORRECT
C	Mark the item yes if a portable fan is available	
D	Leave the item unanswered for corporate review	

Question 84 - q084

What bedroom lock information is documented?

A	Whether the lock is electronic, mechanical, or remotely monitored	
B	Whether the host changes the lock code between every reservation	
C	Whether the lock meets the local building code for rental units	
D	Whether there is no lock, a non-keyed lock, or a keyed lock	CORRECT

Question 85 - q085

Which bedroom item is recommended for securing guest valuables?

A	A combination safe accessible to the guest	CORRECT
B	A locked host closet inside the bedroom	
C	A monitored camera pointed toward the entry	
D	A keyed cabinet controlled by property staff	

Question 86 - q086

What should be recorded when a smart TV is available?

A	The purchase date and remaining manufacturer warranty	
B	The streaming services available through host-provided credentials	CORRECT
C	The television's screen dimensions and electrical consumption	
D	The guest accounts previously used to sign into each service	

Question 87 - q087

What common-room doorway condition may require a threshold ramp?

A	A doorway with a lip or raised bump in the floor	CORRECT
B	A doorway with a coded lock or exterior access	
C	A doorway located beside the main dining table	
D	A doorway wider than the narrowest hallway	

Question 88 - q088

Which common-room entertainment items should be documented?

A	Only televisions and devices permanently attached to the wall	
B	Only amenities that require host-provided login credentials	
C	Reading materials, TV services, games, and local information	CORRECT
D	Furniture brands, decorative artwork, and lighting controls	

Question 89 - q089

What should be recorded when a washer and dryer are present?

A	Only whether the appliances are located in a private space	
B	Their water use and estimated cost for a normal cycle	
C	The cleaning products the host requires guests to use	
D	Condition, usability, photographs, and make and model	CORRECT

Question 90 - q090

Where should an inspector look for a recommended bedroom safe?

A	In the room and logical storage spaces such as the closet	CORRECT
B	Only beside the bed where it is immediately visible	
C	Only in the attached bathroom or common room	
D	Inside any host-locked storage area without permission	

Overall property and guest experience

10 questions in pool - 5 selected for the initial 50-question exam
